 - II. Claims 27-38, drawn to structures/structural elements of server and system for providing services for storing, reading, and extracting various synthesis data, classified in class 704, subclass 270.
4. The inventions are distinct, each from the other because of the following reason:

subcombination has utility by itself or in other combinations (MPEP ' 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the invention II drawn to server side or system level system structure, which can be used for providing services for other kinds of terminal device. The subcombination has separate utility such as exchanging data by using detachable memory device.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II. Restriction for examination purposes as indicated is proper.

6. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
